Microsoft word, Excel,
Photoshop, ACAD,
Solidworks, etc.

Profile

To make even a minute contribution to all my clients!

I studied English for more than 7 years inland and abroad and assigned to several important positions for the cooperation with many foreign clients in scientific and technical fields. Besides, I learned Japanese in my university days, lived in Japan for over 4 years on business and translated a lot of Japanese documents including patents. With a relatively long history of translation (over 20 years) of scientific and technical materials and with MA degree in English linguistics, I am proud of my skill and experience. Now, as a multi-skilled, reliable and experienced translator, I am sure of my hard-working and deadline-keeping with high-quality translation results at a rate much lower than the others. If I can make any minute contribution to my client's great business, it will be my great pleasure and sole happiness.
